

WATTS UP?

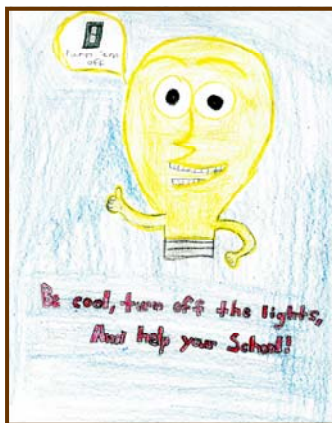

Spring 2009

Joanne Gilbert, LHS, will be attending the Science center for Teaching, Outreach, and Research on Meteorology (the **STORM** Project) at the University of Northern Iowa from June 21 - 26. Tuition, on-campus housing, meals, course materials, a *modest* \$1,000 *stipend* and 2 graduate credits from UNI will be provided by **STORM**. Travel support based on round-trip mileage will also be provided. Joanne will learn about conceptual models and computer-based tools used to study and forecast air quality. A primary goal of the course is the development by participants of classroom activities in air quality. **STORM** seeks to produce a set of activities for national distribution. Participants who develop exceptional activities may have the opportunity to work with **STORM** in the following academic year to refine the set of materials developed in the summer course.

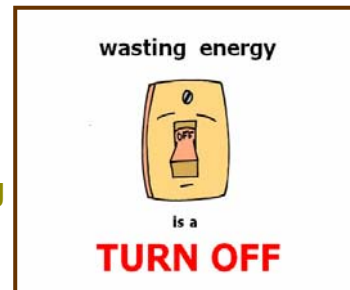

REMEMBER: April 22 is Earth Day!

Elm Street School will be celebrating Earth Day with a poster/essay contest, outdoor recycling games and other special events. WHS is celebrating with the signing chorus performing an Earth Day theme evening and afternoon concert.

Congratulations to Amanda Sardinha (5th grade student at ESS) and Jill Lessard for submitting the winning designs for our "Watts Up?" contest. We had MANY great entries and we will use most of them in the buildings to remind staff about energy conservation. Thanks to all that participated!

The SAU office has had some "greenovations" of their own. New windows and doors were installed and should prove to be much more energy efficient! Check these out next time you are over there.

Green Team Members

LHS	Steve Dalzell/Eric Greenfield/Joanne Gilbert
LMS	Brian Connelly
ESS	Andy Mercer/Sue Goulet
PSS	John Leahy
WHS	Joanna Bergman/Janet Brough
SAU	Ed Emond/Bob Champlin/Tim Goossens
